PARTS & ACCESSORIES

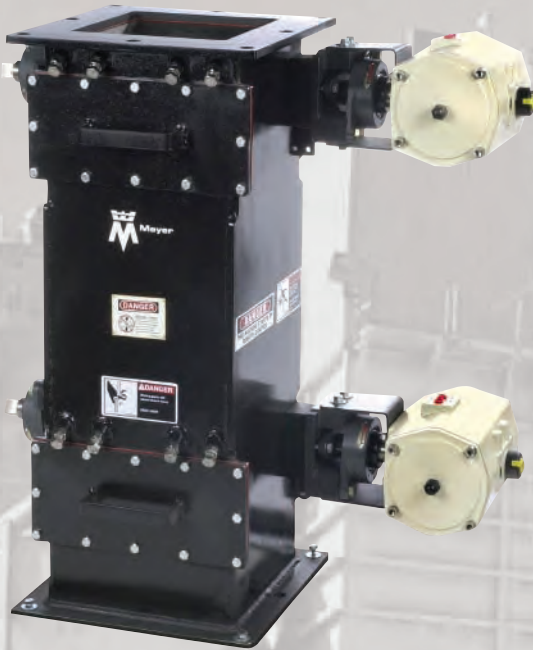

ROTARY AIRLOCKS

- 14 different sizes
- Superior castings - abrasion resistant
- Outboard bearings/replaceable packing
- 8 and 6 vane high capacity rotors
- Pressure differentials to 15 PSI
- Temperatures to 500°F and above
- Multiple drive configurations
- Optional wear-resistant coatings

PRODUCTS

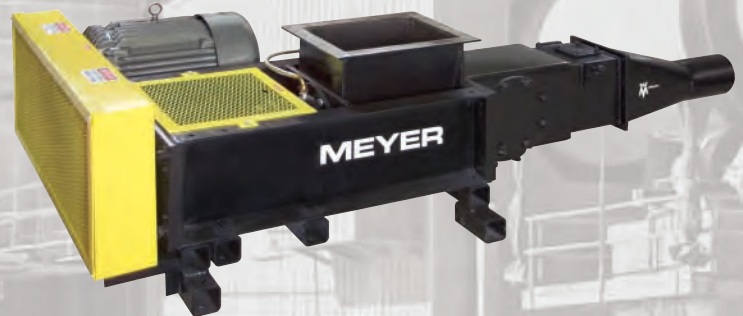

DOUBLE-FLAPGATES

- High pressure with up To 20 Psi differentials
- Extreme temperatures to 1,650°F or higher
- Robust, hybrid construction with no external pinch points
- Up to 60% larger diameter shafts
- Front and rear access panels - simplifies Interior inspection and maintenance
- Dual level arms - assures more uniform gate-to-seat contact
- Hi-chrome white iron seats and flaps for maximum abrasion resistance
- Up to 5 times the life of a typical rotary valve

SCREWVEYORS

- Screw feeder for pneumatic conveying lines up to 15 psi
- Perfect for rock dust recycling
- Intermittent or constant feed
- No blow back while feeding
- Easy to repair in the field
- Capacities up to 100 Tph
